

a Unrelated mechanisms, all amplifying

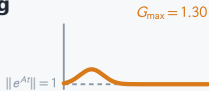

Each system amplifies a perturbation before it decays.

TCR proofreading

immune signalling

each step can fall off

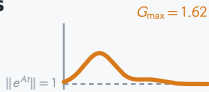

Selkov glycolysis

metabolism

product feeds itself

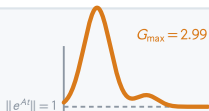

Murphy-Miller

neural

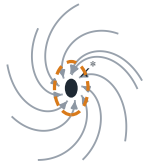

push and pull, matched

b One operator, one choice

The metric sets the summary.

small neighbourhood: $d(\delta x)/dt = A\delta x$
 A is the local operator

Same dynamics, restated

c Descriptor plane

Figure 2 places every model here.
